

Time as a Public Health Control

As outlined in TFER 228.75(i), the following products will be held outside of temperature control for a period of time not exceeding _____ hours (may not be more than 4 hours): (list items here)

The above products will be marked or logged at the time they leave temperature control by using the following procedure (describe procedure here):

I understand that at the end of the designated time out of temperature control, these items must be discarded.
